

Varia-Click Aluminium Systems

Decorative cladding, indoors and outdoors

Varia-Click is developed specially for decorative wall cladding for both indoor and outdoor use. It allows you to easily click aluminium profiles onto interior walls, ceilings and façades. The base profile is mounted first. Afterwards, the top profile is clicked on top of the base. In this way, the fixings always remain hidden and the whole is beautifully finished.

The top profile is also available in wood look – a low-maintenance and lighter alternative to wood slats. Lighter in weight and strong enough to be extremely practical. The coating protects against environmental influences, so painting is not necessary, and aluminium is easy to recycle without loss of quality.

3:rock supplies the full Comhan range in Ireland.

Sizes

Varia-Click 40x30 mm

Varia-Click H-profile 40x49 mm

Varia-Click 50x30 mm

Varia-Click 50x50 mm

Varia-Click 73x30 mm

Varia-Click 73x70 mm

Varia-Click Wall-Mounting Profile 200

Finishes

Mill finish, anodised, powder coated in any RAL colour (glossy, matte or fine texture), or sublimated in wood, stone and metal looks. In stock: Oak textured (73), Natural Oak textured (78) and American Cherry textured (18).

Applications

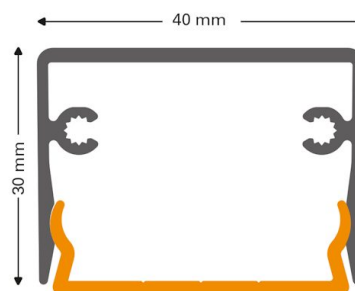

- Chic slatted walls (with or without lighting)
- Walls and ceilings, indoors and outdoors
- Façades, shopfronts and entrances
- Acoustic application in combination with PET felt panels
- Concealing cables and wires (indoors and outdoors)
- Trade fairs and exhibitions (stand construction)
